

MUHAMMAD AASIM AWAN

Android Developer

(+92) 3127547774 • awanaasim115@gmail.com • <https://github.com/Aasim-Awan> • Islamabad, Pakistan

Summary

I am a dynamic Android Developer with a passion for creating user-centric mobile applications. My experience includes developing innovative solutions and optimizing app functionalities using Kotlin, Java, and XML. I thrive in collaborative environments and constantly seek opportunities to advance mobile technologies while delivering high-quality user experiences

Experience

PlayItAgain Islamabad, Pakistan
Junior Android Developer 09/2024 - 07/2025

A company focused on developing innovative mobile applications

- Contributed to building a feature-rich photo editor app with functionalities such as background removal, filters, cropping, blending effects, customizable collage templates, and frame selection
- Focused on optimizing performance and enhancing user experience using libraries like Glide and GPU Image
- Developed a CarPlay emergency app with crash detection leveraging accelerometer data, real-time location tracking, and automated emergency alerts via email
- Learned to implement VPN connection handling with state management and error recovery.
- Gained experience in integrating background services for stable and persistent connections.
- Improved skills in Android UI/UX with custom dialogs, view binding, and onboarding flows.
- Understood session management and secure handling of user preferences.
- Practiced debugging and optimizing app performance for real-time network operations.

GenZonix Islamabad, Pakistan
Junior Android Developer 08/2025 - Present

A company focused on developing innovative mobile applications

- Learned to implement VPN connection handling with state management and error recovery.
- Gained experience in integrating background services for stable and persistent connections.
- Improved skills in Android UI/UX with custom dialogs, view binding, and onboarding flows.
- Understood session management and secure handling of user preferences.
- Practiced debugging and optimizing app performance for real-time network operations.

Rubikkube Islamabad, Pakistan
Flutter Internship 02/2024 - 08/2024

A technology company specializing in mobile application development

- Developed a foundational understanding of mobile app development using the Flutter framework and Dart programming language
- Worked on designing and building basic UI components and applying responsive layouts
- Implemented state management using setState and provider, integrated RESTful APIs, and handled user input effectively

Education

Allama Iqbal Open University Islamabad, Pakistan
Bachelor in Computer Science 08/2018 - 10/2023

Islamabad Model Postgraduate College H-8/2 Islamabad, Pakistan
ICS in Computer Science 08/2016 - 08/2018

Key Achievements

- ★ **CarPlay Emergency App**

Successfully developed a CarPlay emergency app with robust features for crash detection and automated emergency alerts, showcasing technical skills and user-centric design
- ✓ **Photo Editor App**

Contributed to the development of a feature-rich photo editor app, optimizing functionality and enhancing user experience
- 💎 **Vpn App**

Learned how to integrate background services, optimize real-time network operations, and enhance user experience with responsive UI elements.

Projects

CarPlay App 11/2024 - 01/1970

CarPlay emergency app designed for automatic crash detection and emergency notifications

- Developed a CarPlay emergency app with crash detection leveraging accelerometer data and automated emergency alerts
- Incorporated real-time location tracking and intuitive UI for reliable functionality

Photo Editor App 09/2024 - 01/1970

A background remover app with sophisticated editing features

- Developed a feature-rich Photo Editor app with advanced tools including filters, cropping, and background removal
- Focused on creating an intuitive UI for seamless user experience

Vpn App Date period

Static vpn for a single location

- Built a secure VPN application with seamless server switching, automatic reconnection, and state management.
- Implemented user-friendly onboarding with privacy policy consent handling and custom dialogs for premium features.
- Integrated session management, background services, and network monitoring to ensure stable and reliable connections.
